

J.J. COLLEGE OF ARTS AND SCIENCE (AUTONOMOUS), PUDUKOTTAI

DEPARTMENT OF BOTANY

Vermicompost

PG and Research department of Botany has initiated an extension activity viz. Vermicompost production to motivate the students by developing an entrepreneurial skill during the study period. Vermicompost pits were constructed with appropriated size by the management and it was started by the students in the month of June, 2017. Vermicompost production is still running and 5kg pack is available in the Karpaga Vinayaga Agencies near to our College Campus. The amount generated by this extension activity will be utilized only for the student's welfare. The students are really appreciated and voluntarily running this process which enables them to inculcate, develop and entrepreneurial skill through vermicompost.
